## ANOTHER SUCCESSFUL OLYMPICS FOR DARTFISH USERS WORLDWIDE

Once again, the Dartfish unique StroMotion and SimulCam features have been used by broadcasters around the globe, to enhance production and create stunning analyses for the worldwide viewing public. Our real time and post production system personnel worked long hours to bring these great results.

We would like to thank all the broadcasters for their trust and the Dartfish Team that made it happen. Athletes used Dartfish in their training routines, long before arriving at the Winter Games, to analyze their performances and correct mistakes, to evaluate their opponents' performances and to increase their chances of taking home the coveted medals. When rigorous training is behind them and optimum Olympic performance is underway the use of Dartfish continues, ensuring that even the most miniscule mistakes are addressed on their final journey to the medal podium.

**We are proud to announce that Dartfish users from multiple countries won 162 (62% of the total) medals in Vancouver 2010 and we wish to congratulate each one for their Olympic performance.**

While in Vancouver, the Dartfish Team interviewed some of the many Olympic Dartfish users noted below: [Canadian Olympic Committee, Mike Christie](#)

[US Olympic Committee High Performance Center, Scott Riewald](#)

*Canadian freestylers review their performance live on Dartfish.*

*Winning two Olympic medals, USA Bobsled and Skeleton take time out to pose for the camera.*

Note the New York Times article, featuring the US Skiing and Snowboarding Association with use of Dartfish: <http://vancouver2010.blogs.nytimes.com/2010/02/22/training-the-next-generation-of-ski-racers/>
